LabelPlus

Custom *Inspector* property label that allows using an icon, a custom label text and a custom label color.

How to use

Put the attribute in front of a property.

You can specify a icon path, a custom label text and a custom label color.

You can use an empty string for the icon path for not using custom icon.

You can use **LabelPlusColor** *enum* color preset and cast it to int, or an array of float0-1.

Examples

```
[LabelPlus("Assets/PathToYourIcon/health.png", "Health Points", (int)LabelPlusColor.green))]
public int healthPoints;
[LabelPlus("Assets/PathToYourIcon/sword.png", "Health Points", new float[] { 1f, 0f, 0f, 1f }))]
public int damages;
```
